

PRODUCT DESIGNER

YOUR FUNCTION

- You are responsible for the basic and detailed mechanical design of components and assemblies of boilers and energy plants.
- You work in close cooperation with the different project teams, and integrate specific customer requirements into your design.
- As well optimization of existing products, as development and design of new products will be on your agenda.
- You can rely on experienced colleagues and after a training period you will be involved in the design of larger and complex assemblies.
- You will communicate with your colleagues worldwide.

YOUR PROFILE

- You have a master degree in mechanical, power or heat transfer engineering, or equivalent through experience.
- Knowledge of 3D design, preferably of Inventor, is required.
- Experience with design of pressure parts and stress calculations is welcome.
- You are fluent in English.

VYNCKE is a dynamic, family owned company that, since the start in 1912, has grown to a global player in the sector of clean energy technology : more precisely the development and construction of customized waste to energy installations.

Worldwide more than 350 Vynckeneers are stationed in our offices in Brazil, Belgium, Germany, Czech Republic, India, China, Thailand, Spain and Malaysia.

Thanks to more than 4.000 satisfied customers all over the world, a well-lined order book and the loyal commitment of the enthusiastic Vynckeneers we maintain a stable position in the market. This allows us to offer excellent job security.

Are you a real team player, do you enjoy own responsibility and taking initiative, do you have an open international mentality and are you willing to travel? Then probably you could be one of the new Vynckeneers!
