

callensvyncke

CALLENS, a Belgian family firm founded in 1966, is active in the field of heating and air technology for the process engineering industry. They are involved in the installation, engineering and after-sales services for classic fired boilers and industrial piping in Benelux.

VYNCKE, with its over 100 years of experience in combustion technology, delivers tailor-made biomass energy solutions, from 1-100MWth and 1-20MWe to all industries and energy providers, globally.

After several years of successful cooperation between the two companies, a joint venture company called CALLENS VYNCKE was established in 2009. CALLENS VYNCKE acts as an EPC supplier (engineering, procurement, and construction) for gas-fired cogenerations plants between 1 and 20 MWe.
